## Profile

Electronics Engineering graduate, a Full-stack Engineer, looking forward to expanding my knowledge whilst bringing value to my potential company and team.

## Skills

- Front-end: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS.
- Back-end: Node.js, PostgreSQL, Mongo DB, Docker.
- Others: Jest, Cypress, GitHub, Agile Methodologies.

## Education

- ❖ Bachelor's degree in Electronics Engineering - The Future University.
- ❖ Full Stack Development Bootcamp - Code Your Future.
  - I have learned various back-end and front-end development technologies and tools in a collaborative and mentorship environment. Also, I improved my professional skills such as teamwork, pair programming, code review, and Debugging.

## Work Experience

- Junior Software Developer @ CodeYourFuture. Manchester UK  
(August 2023 - Current).

Contributing to the development and upkeep of software tailored for internal use or by charitable organizations to empower refugees and individuals from low-income backgrounds to start a career in tech.

- Arabic interpreter - DASH Charity, Huddersfield (March 2022 - present).
- Receptionist - DASH Charity, Huddersfield (June 2022 - present).
- Trustee - DASH Charity, Huddersfield (September 2022 - present).

- Self-Employed (2015 - 2020).

I have managed various projects in many sectors including restaurants, hospitality, and Agriculture. My role was to plan and monitor daily operations for the business.

- Help desk Specialist - Kenana Sugar Company (2014- 2015).

I was responsible for providing technical assistance and support to end-users regarding software, hardware, and other computer-related issues.

## Projects

### 1 - CYF Coding Bootcamp final project: Content management system(CMS)

<https://starter-kit-fhvk.onrender.com>

Participated as full stack developer in a team of 6 in an Agile/ Scrum environment to create a CMS for an overseas charity organisation to help them to show their work to the public.

- Implemented React.JS with Ant design as a component library for the front end.
- Implemented Node.JS and PostgreSQL for the back-end and Database.

### 2- MunchMaster: <https://munchymaster.netlify.app>

A Full stack app for busy developers!! which allows them to list, review and price their favourite restaurants so they can quickly decide on their next meal without any hassle !!

Tech stack: Postgres, Express.js, React.js, Node.js.

### 3 - Personal portfolio: <https://jihad-omer.vercel.app>

A personal website lets the visitor know more about me, it includes the latest and upcoming projects I am working on.

Tech stack: Next.js, TypeScript, Tailwind CSS.
